ABOUT ME

Full Stack Developer in training (final year) with IT support background. Proficient in MERN stack, Angular, NestJS, and AWS services. I combine strong technical skills with problem-solving abilities, proactivity, and teamwork. Open to remote opportunities worldwide.

WORK EXPERIENCE

IT Support Specialist   May 2023 - Jul 2025

Instituto Santa Catalina • Argentina

- Managed network infrastructure for 200+ users, reducing incidents by 30% through preventive maintenance.
- Developed automation scripts in Python/Bash for repetitive tasks, optimizing configuration times.
- Implemented security policies and backup procedures ensuring operational continuity with 99.5% uptime.
- Provided Tier 1 and Tier 2 technical support, documenting solutions in internal knowledge base.

FEATURED PROJECTS

ITS-Microservice + Frontend Angular

Full-stack system with microservices architecture for product, user, and billing management. Backend with RESTful APIs, multiple databases, and containerized deployment.

Tech Stack: NestJS, Angular, TypeScript, PostgreSQL, MongoDB, MySQL, Docker, Prisma, TypeORM

My-Notion

Functional Notion clone featuring a rich text editor, page organization, and data persistence. Modern interface with drag & drop functionality.

Tech Stack: TypeScript, React, Node.js, Supabase

EDUCATION

Associate Degree in Full Stack Software Development   2023 - Present

Instituto Técnico Superior de Cipolletti • Argentina • Final year in progress
